**Apparent Simazine 900 WG**

**ACTIVE CONSTITUENT:** 900 g/kg SIMAZINE

**GROUP C HERBICIDE**

For the control of weeds in chickpeas, lupins, TT-Canola, orchards, viticulturists and certain other horticultural and non-crop situations as per the Directions for Use table.

**IMPORTANT:** Read the attached booklet before use.

**APVMA Approval No:** 65158/50898

**T +61 3 9822 1321**

**READ SAFETY DIRECTIONS BEFORE OPENING OR USING**

**Almonds**

Anchusa, Annual Ryegrass, Annual Thistles, Barley

SA only

1 g/kg 
60 g/100L

2 kg or
120 g/100L

Use only if trees are at least 3 years old. Apply to bare moist soil immediately after cultivation and before weeds emerge.

Asparagus

All States

1.3 kg
2.5 kg

Apply to bare moist soil after last cultivation and before sowing or emersion.

Berry Fruits,

Qld, WA only

2 kg
4 kg

Use only if trees are at least one year old.

Citrus

All States

2.5 kg/ha or
120 g/100L

Use only if vines are at least 2 months old.

Grapevines

Amaranthus, Annual Ryegrass, Barley Grass, Brome Grass, Volunteers Canola, Soursob and Wireweed.

Qld, NSW, Vic, SA, Tas only

1.25kg or
60g/100L
2.5 kg/ha or
120 g/100L

Use only if vines are at least 12 months old. In the first year of use, split applications are preferred.

Hops

Amaranthus, Annual Ryegrass, Barley Grass, Brome Grass, Volunteers Canola, Soursob and Wireweed.

Qld Only

2 kg
4 kg

Use only if vines are at least 2 years old.

Canola (Traziane tolerant varieties only)

Pre-emergence or post sowing

Pre-emergence

Amaranthus, Annual Ryegrass, Barley Grass, Brome Grass and Wild Oats.

All States

1.1 kg
2.2 kg

Important: This use is subject to adherence to the Integrated Weed Management Strategy for triazine tolerant (T) canola. See General Instructions: Integrated Weed Management Strategy for TT-Canola. Can be applied up to a week before sowing or post-emergence pre-emergence (ideally incorporated by harrowing). For best results, apply to bare moist soil, either immediately before sowing or as a pre-emergence treatment at or within 7 days of planting. Sufficient rainfall (20-30mm) to wet the soil through the weed root zone is necessary within 2-3 weeks of application. Application should not be made to ridged or excessively cloddy soil. When applied before sowing, incorporate to a depth of 5 cm.

Chickpeas

Qld, NSW, Vic, SA, Tas only

1.3 kg
2.5 kg

Apply to bare moist soil. DO NOT use rates higher than 1.1 kg/ha on soils with pH 6.0 and above as unacceptable crop damage may occur.

Lupins

All States

1 kg or
550 g

Do not exceed 500g/ha on Lupin Variety Ultra. Apply immediately before or within 7 days after sowing. Apply as a tank mixture to a moist bare level soil and incorporate to a depth of 50mm prior to sowing. For fully reliable results significant rainfall (20 to 30 mm) is necessary within 2 to 3 weeks of application.

Faba Beans

Annual Ryegrass, Barley Grass, Brome Grass, Capeweed, Corn Gromwell (Sheepweed), Deadnettle, Fumitories, Geranium, Ivy-Leaf Speedwell, Mustards, Paradoxa Grass, Saffron Thistle, Soursob, Volunteer Canola, Wireweed and Suppression of Wild Oats.

Qld, Vic, SA, WA only

1 kg
2.5 kg

Apply to bare moist soil. DO NOT use rates higher than 1.1 kg/ha on soils with pH 6.0 and above as unacceptable crop damage may occur.
INTEGRATED WEED MANAGEMENT STRATEGY FOR TT CANOLA

Apparent Simazine 900 WG Herbicide is a pre-emergent herbicide, which is most effective when applied to bare, moist soil. Because it acts mainly through the root system, a significant seedling population must be on or near the surface. Suitable weed species includes:

- Annual (Wimmera), Subterranean Clover present before spraying. Use the lower rate on light soils in WA & SA. For short term weed control or when applied with other herbicides use half rates according to the situation. Apply to bare soil in WA.
- DO NOT use herbicides for broadleaved weed control within 3 weeks of application.
- Use the lower rate on light soils in WA & SA. For short term weed control or when applied with other herbicides use half rates according to the situation. Apply to bare soil in WA.
- Resist weed seedlings may occur. DO NOT apply to sandy soils and use the lower rate on fine-textured soils. Applied to dry soil the residual activity will be reduced. DO NOT apply to bare soil in WA.
