Apparent

Diflufenican 500 SC

HERBICIDE

ACTIVE CONSTITUENT: 500g/L DIFLUFENICAN

GROUP 12 HERBICIDE

For control of certain weeds in clover-based Pasture, Field Peas, Lentils, Lupins and Oilseed Poppy as specified in Directions for Use Table. IMPORTANT. READ THIS BOOKLET BEFORE USE.

MA Approval No: 67933/1

AIRR APPARENT PTY LTD 15/16 Princes Street, Newport NSW 2106 P 03 5820 8400 | E enquiries@apparentag.com.au | www.apparentag.com.au

DIRECTIONS FOR USE RESTRAINTS

DO NOT apply if crop or weeds are stressed due to dry or excessively moist conditions.

DO NOT apply to crops under stress due to pre-emergence herbicide, root disease, insect damage, nutrient

deficiency, excessively moist or dry conditions or extremes of pH.

DO NOT apply to frost affected crops or if frosts are imminent.

DO NOT apply if heavy rain is expected within 4 hours.

| Weeds Controlled | | Weed Stage | Rate | Critical Comments |
|--|---|---|---|--|
| Wild Radish (<i>Raphanus raphanistrum</i>) | WA only | Up to 2 leaf stage and not more | 100mL/ha | CROP STAGE |
| | | than 60mm in diameter | | Sow crop evenly to a depth of 20 to 50mm. |
| | | Up to 4 leaf stage and not more | 150mL/ha | CLOVER BASED PASTURE: |
| | | than 120mm in diameter | | Apply post-emergence, not before the 3 trifoliate leaf stage. |
| | | Up to 6 leaf stage and not more | 200mL/ha | Warning: Some species and varieties may be more sensitive than others. Refer to legume |
| | | | | tolerance table in the General Instructions. DO NOT apply to medics or yellow serradella. |
| | , , , | 1 5 | | |
| | | | | FIELD PEAS: |
| Hedge Mustard (Sisymbrium | WA only | Up to 2 leaf stage and not more | 100mL/ha | Apply early post-emergence after the third node stage and before the start of flowering. |
| officinale), Indian Hedge Mustard | | than 60mm in diameter | | Warning: Field Peas grown on high pH soils in the presence of free lime may be less tolerant |
| (Sisymbrium orientale), Wild Turnip | | Up to 4 leaf stage and not more | 150mL/ha | to Apparent Diflufenican 500 SC Herbicide. |
| (Brassica tournefortii) | | | | LENTILS: |
| | | | 200mL/ha | Apply early post-emergence after the third node stage of the crop. |
| | | | | Warning: Some lentil varieties may be more sensitive than others. DO NOT apply to Northfield |
| Turnip Weed (<i>Rapistrum rugosum</i>) | , , , | | | variety. Avoid spray overlap. |
| | , . , | than 120mm in diameter | | LUPINS: |
| Charlock (Wild Mustard) (Sinapis | NSW, ACT, Vic, | | | |
| arvensis), Deadnettle (Lamium | Tas, SA only | | | Post-emergence of Crop: Apply post-emergence from the 2 leaf to the 6 leaf stage of crop |
| amplexicaule) | | | | (40 to 100mm high). |
| Prickly Lettuce (Lactuca serriola) | | Up to 2 leaf stage and not more | | Post-sowing, Pre-emergence of Crop (Not WA): Apply in a tank mix with the |
| Pheasants Eye (Adonis macrocarpa) | SA only | than 60mm in diameter | | recommended rate of post-sowing pre-emergence treatment of simazine. (Apparent |
| | | | | Diflufenican 500 SC Herbicide should NOT be incorporated). |
| | | | | APPLICATION AND WEED CONTROL: |
| | | | | Apply when weeds are actively growing. For optimum results apply 4 to 6 weeks post-sowing. |
| | | | | Application beyond 8 week post-sowing may result in reduced levels of weed control. In most |
| | | | | situations the rate specified for each weed size will give satisfactory control. |
| | Nild Radish (<i>Raphanus raphanistrum</i>) Hedge Mustard (<i>Sisymbrium</i> officinale), Indian Hedge Mustard (<i>Sisymbrium orientale</i>), Wild Turnip (<i>Brassica tournefortii</i>) Turnip Weed (<i>Rapistrum rugosum</i>) Charlock (Wild Mustard) (<i>Sinapis</i> <i>arvensis</i>), Deadnettle (<i>Lamium</i> <i>amplexicaule</i>) Prickly Lettuce (<i>Lactuca serriola</i>) | Wild Radish (Raphanus raphanistrum) WA only NSW, ACT, Vic, Tas, SA only Hedge Mustard (Sisymbrium officinale), Indian Hedge Mustard WA only (Sisymbrium orientale), Wild Turnip WSW, ACT, Vic, (Brassica tournefortii) NSW, ACT, Vic, Turnip Weed (Rapistrum rugosum) NSW, ACT, Vic, Turnip Weed (Rapistrum rugosum) NSW, ACT, Vic, Charlock (Wild Mustard) (Sinapis arvensis), Deadnettle (Lamium amplexicaule) NSW, ACT, Vic, Prickly Lettuce (Lactuca serriola) Tas, SA only | Wild Radish (Raphanus raphanistrum) WA only Up to 2 leaf stage and not more than 60mm in diameter Up to 4 leaf stage and not more than 120mm in diameter Up to 4 leaf stage and not more than 120mm in diameter Hedge Mustard (Sisymbrium officinale), Indian Hedge Mustard (Sisymbrium orientale), Wild Turnip (Brassica tournefortii) WA only Up to 4 leaf stage and not more than 120mm in diameter NSW, ACT, Vic, ISymbrium officinale), Indian Hedge Mustard (Sisymbrium orientale), Wild Turnip (Brassica tournefortii) WA only Up to 2 leaf stage and not more than 120mm in diameter NSW, ACT, Vic, ISymbrium orientale), Wild Turnip (Brassica tournefortii) NSW, ACT, Vic, Tas only Up to 4 leaf stage and not more than 120mm in diameter Verify Leaf Stage and not more than 120mm in diameter NSW, ACT, Vic, Tas, SA only Up to 4 leaf stage and not more than 120mm in diameter Verify Leaf Stage and not more than 180mm in diameter NSW, ACT, Vic, Tas, SA only Up to 4 leaf stage and not more than 180mm in diameter Verify Lettuce (Lamium amplexicaule) NSW, ACT, Vic, Tas, SA only Up to 4 leaf stage and not more than 120mm in diameter Prickly Lettuce (Lactuca serriola) NSW, ACT, Vic, Tas, SA only Up to 2 leaf stage and not more | Wild Radish (Raphanus raphanistrum) WA only Up to 2 leaf stage and not more than 60mm in diameter 100mL/ha Up to 4 leaf stage and not more than 120mm in diameter Up to 4 leaf stage and not more than 120mm in diameter 150mL/ha Weight of the stage and not more than 120mm in diameter WK only Up to 6 leaf stage and not more than 180mm in diameter 100mL/ha Hedge Mustard (Sisymbrium officinale), Indian Hedge Mustard (Sisymbrium orientale), Wild Turnip (Brassica tournefortii) WA only Up to 2 leaf stage and not more than 120mm in diameter 100mL/ha NSW, ACT, Vic, (Sisymbrium orientale), Wild Turnip (Brassica tournefortii) WSW, ACT, Vic, Tas only Up to 4 leaf stage and not more than 120mm in diameter 150mL/ha Turnip Weed (Rapistrum rugosum) NSW, ACT, Vic, Tas, SA only Up to 4 leaf stage and not more than 120mm in diameter 150mL/ha Charlock (Wild Mustard) (Sinapis arvensis), Deadnettle (Lamium amplexicaule) NSW, ACT, Vic, Tas, SA only Up to 2 leaf stage and not more than 120mm in diameter 100mL/ha Prickly Lettuce (Lactuca serriola) Up to 2 leaf stage and not more than 120mm in diameter 100mL/ha |

| Crop | Weeds Controlled | State | Weed Stage | Rate | Critical Comments |
|--------------|---|------------------|---------------------------------|------------|--|
| Clover-based | Capeweed (Arctotheca calendula), | NSW, ACT, Vic, | Up to 4 leaf stage and not more | 200mL/ha | a Under certain conditions such as: |
| Pasture, | Crassula (<i>Crassula</i> spp.) | Tas, SA, WA only | than 120mm in diameter | | High crop and weed density |
| Field Peas, | Corn Gromwell (Buglossoides | | | | Last season's germinations |
| Lentils, | <i>arvense</i>), Marshmallow (<i>Malva</i> | | | | Abnormal weed growth (including early flowering) |
| Lupins | parviflora), Shepherd's Purse | | | | Higher rates of product (up to the maximum rate of application specified for that weed) may be |
| | (Capsella bursa-pastoris) | | _ | | required. |
| | Chickweed (Stellaria media), Hyssop | NSW, ACT, Vic, | | | Apparent Diflufenican 500 SC Herbicide will NOT effectively control: |
| | Loosestrife (<i>Lythrum hyssopifolia</i>), | Tas, SA only | | | Re-growth of suppressed weeds |
| | Mouse- eared Chickweed (Cerastium | | | | Transplanted weeds |
| | glomeratum), Night-scented Stock | | | | Re-growth from rhizomes or roots |
| | (<i>Matthiola longipetala</i>), Skeleton | | | | Weeds growing under stress from previous herbicide applications. |
| | Weed (<i>Chondrilla juncea</i>), Speedwell | | | | The level of effective residual control may be reduced where: |
| | (<i>Veronica hederifolia</i>) Amsinckia (<i>Amsinckia</i> spp.), Wireweed | NSW, ACT, Vic, | Up to 2 leaf stage and not more | | Rates lower than 200mL/ha are used |
| | (Polvaonum aviculare) | | than 60mm in diameter | | Altes lower than 200 Alter are used Dry conditions prevail |
| | Paterson's Curse (Salvation Jane), | NSW, ACT, Vic, | | | |
| | (<i>Echium plantagineum</i>), Rough Poppy | SA only | | | Poor coverage of the soil surface is achieved Corp is planted in pop watting and |
| | (Papaver hybridum) | j | | | Crop is planted in non-wetting sand |
| | Sorrel (<i>Rumex acetosella</i>), Toad Rush | NSW, ACT, Vic, | - | | Soils have a high content of clay or organic matter. |
| | (Juncus bufonius) | Tas, SA only | | | Where weeds are present at application, good spray coverage of the weeds is important. Apply |
| | Stinging Nettle (Urtica urens) | NSW, ACT only | Cotyledon stage | | before the crop canopy obscures weeds. Weed control may be reduced in areas where trash is |
| | | | | | dense or burnt straw from previous harvest is dense, such as in header trails. Best results will |
| Oilseed | Charlock (<i>Sinapis arvensis</i>), Hedge | Tas only | Early post-emergence up to the | 150mL/ha | be obtained if good soil moisture exists at and after application. |
| Poppy | Mustard (<i>Sisymbrium officinale</i>), | las ully | 4 leaf stage and not more than | (4-6 leaf | |
| i oppy | Indian Hedge Mustard (<i>Sisymbrium</i> | | 120mm in diameter | stage) and | Apparent Diflufenican 500 SC Herbicide may be mixed with diquat or asulam based on // recommendations from poppy contracting companies. DO NOT use in mixtures with Tramat. |
| | orientale), Wild Radish (<i>Raphanus</i> | | | or 200mL | |
| | raphanistrum), Wild Turnip (Brassica | | | ha (6-10 | |
| | tournefortii) | | | leaf crop | |
| | loundoning | | | stage) | |

NOT TO BE USED FOR ANY PURPOSE, OR IN ANY MANNER CONTRARY TO THIS LABEL UNLESS Authorised under appropriate legislation Muthula ping period, not decourded when used as directed

WITHHOLDING PERIOD: NOT REQUIRED WHEN USED AS DIRECTED.

GENERAL INSTRUCTIONS

For use as an early post-emergence spray in clover-based pasture, field peas, lentils and lupins. Apparent Diflufenican 500 SC Herbicide may also be used as a pre-emergence spray on lupins in NSW, ACT, Vic, SA and TAS.

This product provides both contact and residual activity. Residual activity can be expected for up to 8 weeks after application under favourable growing conditions.

This product is taken up by the shoots of germinating seeds and seedlings. Susceptible weeds germinate but show immediate chlorosis followed by a mauve-pink discolouration. The chlorosis spreads with the aerial growth and the plants become necrotic and die back.

After application, some transient crop discolouration may occur. In lentils and lupins, this usually appears as yellow or white banding on the leaves, while in clover and field peas, white/pink colouration of the leaf veins and tips may occur. Some crop height reduction may also occur.

Provided the crop is not under stress from pre-emergence herbicide, disease, insect damage, nutrient deficiency, frost, extremes of pH, dry or excessively moist conditions, the development of the crop and all subsequent growth will not be affected.

Some pre-emergence herbicides, such as atrazine, can cause stress to certain crops resulting in an increase in crop damage when using this product. Field peas are particularly sensitive.

RESISTANT WEEDS WARNING

Apparent Diflufenican 500 SC Herbicide is a member of the Nicotinanalide group of herbicides and acts by inhibiting carotenoid biosynthesis. For weed resistance management Apparent Diflufenican 500 SC Herbicide is a Group 12 herbicide. Some naturally occurring weed biotypes resistant to Apparent Diflufenican 500 SC Herbicide and other Group 12 herbicides may exist through normal genetic variability in any weed population if these herbicides are used repeatedly. These resistant weeds will not be controlled by Apparent Diflufenican 500 SC Herbicide or other Group 12 herbicides. Since the occurrence of resistant weeds is difficult to detect prior to use, Apparent Pty Ltd accepts no liability for any losses that may result from the failure of Apparent Diflufenican 500 SC Herbicide to control resistant weeds.

CLOVER TOLERANCE TABLE

The following varieties of subterranean clover have been tested for effects on seed yield: Seaton Park, Trikkala and Woogenellup. Some reduction in seed yield may occur with cv. Trikkala.

| Variety | Effect on Vegetative Growth | Variety | Effect on Vegetative Growth |
|--------------------------|--------------------------------|--------------------------|--------------------------------|
| Arrowleaf (Zulu) | Moderate | Subterranean (Mt Barker) | Moderate |
| Balansa (Paradana) | Moderate | Subterranean (Seaton | Minimal |
| Persian (Kyambro) | Minimal | Park) | |
| Strawberry (Palestine) | Moderate | Subterranean (Trikkala) | Minimal |
| Subterranean (Clare) | Moderate | Subterranean | Moderate |
| Subterranean (Junee) | Moderate | Woogenellup) | |
| Subterranean (Karridale) | Moderate | White (Haifa) | Moderate |
| Subterranean (Larissa) | Moderate | | |

Reduction in growth - Minimal (0-20%), Moderate (20-50%)

<u>Subsequent Crop Tolerance</u>: To reduce the effect on subsequent susceptible crops (eg. canola) ensure thorough cultivation of soil prior to the sowing of these crops.

MIXING

Stir product or invert container several times before use as settling may occur after storage for some weeks. To ensure even mixing, half fill the spray tank with clean water and add the required amount of product. Agitate thoroughly then add the remainder of the water. Agitate thoroughly while carrying out spray operations. Re-seal part-used container immediately after use.

APPLICATION

<u>Ground:</u> A minimum water rate of 50L/ha should be used, however for optimum results, water rates of 70-100L/ha are recommended. Increase the water volume where weed infestation is heavy or the crop cover is dense. Complete coverage of weeds is essential. Higher water volumes (up to 100L/ha) will ensure improved activity of the product on the weeds but may increase the symptoms of crop damage.

The following settings are examples that will ensure excellent coverage of exposed weeds:

| Water Rate | 50L/ha | 75L/ha | 75L/ha |
|------------|----------------------------|----------------------------|----------------------------|
| Nozzle | Hardi No. 10 or equivalent | Hardi No. 12 or equivalent | Hardi No. 14 or equivalent |
| Speed | 10kph | 10kph | 10kph |
| Pressure | 240kpA (2.4 bar) | 220kpA (2.2 bar) | 210kpA (2.1 bar) |

COMPATIBILITY

Apparent Diflufenican 500 SC Herbicide is physically compatible with most currently registered grass herbicides as two-way tank mixtures.

| Apparent Diflufenican 500 SC | Compatible Products | | |
|------------------------------|---|--|--|
| Herbicide | | | |
| Up to 150mL | Simazine (500g/L product) up to 1L/ha | | |
| All rates | Insecticides: deltamethrin, dimethoate formulations, alpha- | | |
| | cypermethrin, lambda-cyhalothrin, omethoate and bifenthrin. | | |
| | Herbicides: metribuzin and haloxyfop. | | |

Warning: For tank-mixtures with grass herbicides, use the recommended rates for both herbicides as well as the surfactant recommendation of the grass herbicide. Read the label for the grass herbicide before mixing and using the tank mixtures. DO NOT use crop oils with Apparent Diflufenican 500 SC Herbicide or Apparent Diflufenican 500 SC Herbicide/grass herbicide tank mixtures. Applications to lupins and field peas under stressed conditions may cause significant damage to the crop. Tank-mixes with simazine should be applied post-emergence to lupins crops only. Increased crop effects may be experienced with the tank mix. DO NOT apply tank-mixtures to clover. When tank-mixing Apparent Diflufenican 500 SC Herbicide and haloxyfop products, use a surfactant only. Mixtures of Apparent Diflufenican 500 SC Herbicide and haloxyfop products applied to lupins or field peas can cause damage that may result in yield losses. Consult your local AIRR Apparent Pty Ltd representative or the relevant grass herbicide manufacturer for advice on application and timing of tank-mixtures.

As formulations of other manufacturers' products are beyond the control of AIRR Apparent Pty Ltd, all mixtures should be tested prior to mixing commercial quantities.

PROTECTION OF WILDLIFE, FISH, CRUSTACEANS AND ENVIRONMENT

DO NOT contaminate streams, rivers or watercourses with the chemical or used containers. DO NOT apply under weather conditions, or from spraying equipment, that may cause spray to drift onto nearby susceptible plants/crops, cropping land or pastures.

STORAGE AND DISPOSAL

Keep out of reach of children.

Store in the closed, original container in a cool, well-ventilated area, out of direct sunlight. Triple rinse containers before disposal. Add rinsings to spray tank. Do not dispose of undiluted chemicals on site. If recycling, replace cap and return clean containers to recycler or designated collection point. If not recycling, break, crush or puncture and deliver empty packaging for appropriate disposal to an approved waste management facility. If an approved waste management facility is not available, bury the empty packaging 500mm below the surface in a disposal pit specifically marked and set up for this purpose clear of waterways, desirable vegetation and tree roots, in compliance with relevant Local, State or Territory government regulations. DO NOT burn empty containers or product.

SAFETY DIRECTIONS

Avoid contact with eyes and skin. Wash hands after use.

FIRST AID

If poisoning occurs, contact a doctor or Poisons Information Centre. Phone Australia 131126; New Zealand 0800 764 766.

SAFETY DATA SHEET

Additional information is listed in the Safety Data Sheet (SDS) which can be obtained from the supplier.

CONDITIONS OF SALE

AIRR APPARENT Pty Ltd shall not be liable for any loss injury damage or death whether consequential or otherwise whatsoever or howsoever arising whether through negligence or otherwise in connection with the sale supply use or application of this product. The supply of this product is on the express condition that the purchaser does not rely on AIRR APPARENT's skill or judgment in purchasing or using the same and every person dealing with this product does so at his own risk absolutely. No representative of AIRR APPARENT Pty Ltd has any authority to add to or alter these conditions.
