RESTRAINT: DO NOT mix this product with legume Rhizobium inoculant

The state of the s			
SEED TYPE	DISEASE	RATE	CRITICAL COMMENTS
	Black Spot (Lead and Pod Spot and Collar Rot) (Mycosphaerella pinodes, Ascochyta pisi, Phoma medicaginis, var. pinodella)	100kg of	Peas, lentils, faba beans, vetch: This liquid seed dressing may be diluted with 1 part water to 2 parts product. Apply 300mL of diluted mixture to 100kg of seed.
	Seedling Root Rots (Fusarium spp., *Macrophomina phaseolina)		Chickpeas: In the case of chickpea seed, mix 8 parts of water to 2 parts of product. Apply 1L of diluted mixture to 100kg of chickpea seed.
Chickpeas	Ascochyta Blight (<i>Ascochyta rabiet</i>), Botrytis Seed Rot (<i>Botrytis cinerea</i>), Seedling Root Rots (<i>Fusarium</i> spp., <i>Pythium</i> spp.)		Seed must be treated uniformly using correctly calibrated seed treatment equipment. Secondary mixing of treated seed (e.g. in an auger) is important to obtain even coverage. In the case of <i>Ascochyta</i> (peas, chickpeas and lentils) and <i>Botrytis</i> (chickpeas),
Lentils	Ascochyta Blight (<i>Ascochyta lentis</i>), Seedling Root Rots (<i>Fusarium</i> spp., <i>Pythium</i> spp.)		Apparent Deadlock Fungal Seed Dressing will provide control of seed borne infection but follow-up foliar fungicide sprays registered for this purpose will be required to
Faba Beans, Vetch	Seedling Root Rots (Fusarium spp., Pythium spp.)		control field infection from other sources.

NOT TO BE USED FOR ANY PURPOSE, OR IN ANY MANNER, CONTRARY TO THIS LABEL UNLESS AUTHORISED UNDER APPROPRIATE LEGISLATION

WITHHOLDING PERIOD: NOT REQUIRED WHEN USED AS DIRECTED

GENERAL INSTRUCTIONS

TThis product does not adversely affect germination, however when Rhizobium cultures may occur and contribute to nozzle blockages. other containers which have held treated seed. (inoculum) are also added to seed, the viability FUNGICIDE RESISTANCE WARNING of the inoculum may be reduced. Always apply the fungicide first and allow to dry. Apply the inoculum immediately prior to sowing. Seed treatment will control Black Spot and Fusarium spp., Ascochyta spp. and Botrytis cinerea pathogens already present in pea seed. Treatment will also give young pea plants early protection from any external infection from Black Spot

*This disease is not known to occur in WA

Seed treatment can alter seed flow characteristics. The drill should be recalibrated using treated seed prior to seeding. Equipment used for applying this product can be cleaned out with water. All seed that has been stored may lose viability especially if it becomes hot or damp. Apparent Deadlock Fungal Seed Dressing has no adverse effect on seed viability or seedling vigour for up to 15 tested for germination in the year it is used to to establish the optimum seedling density. Apparent Deadlock Fungal Seed Dressing treated Seed Dressing to control resistant fungi seed carried over from previous seasons may not PROTECTION OF LIVESTOCK provide adequate control of soil borne pathogens DO NOT allow treated seed to contaminate grain (eg. Pythium spp. and Fusarium spp.). Treated seed is to be used only for sowing.

Shake well before use. Add water and product PROTECTION OF WILDLIFE, FISH, to the applicator tank and mix well. Maintain agitation during use. Where the diluted

agitated well. DO NOT permit this product to dry-out in application equipment as flaking

Apparent Deadlock Fungal Seed Dressing is a combination of a benzimidazole and a Multi-site Activity fungicide. For fungicide resistance management Apparent Deadlock Fungal Seed Dressing is both a Group M3 and a Group 1 fungicide. Some naturally occurring individual fundi resistant to Apparent Deadlock Fungal Seed Dressing and other Group M3 and/or Group 1 fungicides may exist through normal genetic variability in any fungal population. The resistant individuals can eventually dominate the fungi population if these fungicides are used repeatedly These resistant fungi will not be controlled by Apparent Deadlock Fungal Seed Dressing and other Group M3 and/or Group 1 fungicides, thus resulting in a reduction in efficacy and possible yield loss. Since the occurrence of resistant fungi is difficult to detect prior to use, Apparent Pty Ltd ensure that there is sufficient viable seed sown accepts no liability for any losses that may result from the failure of Apparent Deadlock Fungal

intended for animal consumption. Treated seed is not to be used as food for poultry or any
