RESISTANT WEEDS WARNING:

GROUP **K** HERBICIDE

Apparent Demolish Selective Herbicide is a member of the Organoarsenic group of herbicides. For weed resistance management Apparent Demolish Selective Herbicide is a group K herbicide. Some naturally occurring weed biotypes resistant to Apparent Demolish Selective Herbicide and other group K herbicides may exist through normal genetic variability in any weed population. The resistant individuals can eventually dominate the weed population if these herbicides are used repeatedly. These resistant weeds will not be controlled by Apparent Demolish Selective Herbicide or

other group K herbicides.

Since the occurrence of resistant weeds is difficult to detect prior to use, AIRR Apparent Pty Ltd accepts no responsibility for any losses that may result from the failure of Apparent Demolish Selective Herbicide to control resistant weeds.
