### FUNGICIDE RESISTANCE WARNING

**GROUP 3 FUNGICIDE**  
Apparent Superstar Liquid Seed Dressing is a member of the DM1 group of fungicides. For fungicide resistance management, the product is a Group 3 fungicide. Some naturally occurring individual fungi resistant to the product and other Group 3 fungicides may exist through normal genetic variability in any fungal population. The resistant individuals can eventually dominate the fungal population if these fungicides are used repeatedly. These resistant fungi will not be controlled by this product and other Group 3 fungicides, thus resulting in a reduction in efficacy and possible yield loss. Since the occurrence of resistant fungi is difficult to detect prior to use, Apparent Pty Ltd accepts no liability for any losses that result from failure of this product to control resistant fungi.

### INSECTICIDE RESISTANCE WARNING

**GROUP 3A INSECTICIDE**  
For insecticide resistance management Apparent Superstar Liquid Seed Dressing is a Group 3A insecticide. Some naturally occurring insect biotypes resistant to the product and other Group 3A insecticides may exist through normal genetic variability in any insect population. The resistant individuals can eventually dominate the insect population if this product or other Group 3A insecticides

are used repeatedly. The effectiveness of this product on resistant individuals could be significantly reduced. Since occurrence of resistant individuals is difficult to detect prior to use, Apparent Pty Ltd accepts no liability for any losses that may result from the failure of this product to control resistant insects.

Apparent Superstar Liquid Seed Dressing may be subject to specific resistance management strategies. For further information contact your local supplier, Apparent Pty Ltd representative or local agricultural department agronomist.

### PROTECTION OF CROPS, NATIVE AND OTHER NON-TARGET PLANTS
