

# SAFETY DATA SHEET

## SECTION 1

## IDENTIFICATION OF THE MATERIAL AND SUPPLIER

**Product Name:** Apparent Bentazone 480 SL Herbicide

**Other Names: Use:** Bentazone, Group 6 Herbicide.  
**Company:** A selective, post-emergence agricultural herbicide.  
**Address:** AIRR Apparent Pty Ltd  
15/16 Princes Street, Newport NSW 2106  
**Email:** enquiries@apparentag.com.au  
**Phone Number:** 03 5820 8400  
**Emergency Contact:** 0437 303 689

## SECTION 2

## HAZARDS IDENTIFICATION

**Classified as hazardous according to criteria of Safe Work Australia.  
Not classified as a Dangerous Good according to the ADG Code.**

### GHS Classification:

Acute Toxicity – Oral: Category 4.  
Sensitization – Skin: Category 1, 1A, 1B.  
Eye Damage/Irritation: Category 2A.

**Signal Word:** WARNING.

### Hazard Statements:

H302 Harmful if swallowed.  
H317 May cause an allergic skin reaction.  
H319 Causes serious eye irritation.

### Precautionary statements:

#### Prevention:

P261 Avoid breathing dust/mist/vapours/spray.  
P264 Wash contacted areas thoroughly after handling.  
P270 Do not eat, drink or smoke when using this product.  
P272 Contaminated work clothing should not be allowed out of the workplace.  
P280 Wear protective gloves/protective clothing/eye protection/face protection.

#### Response:

P301+P312: IF SWALLOWED: Call a POISON CENTRE or doctor if you feel unwell.  
P302 + P352 IF ON SKIN: Wash with plenty of soap and water.  
P333 + P313 If skin irritation or rash occurs: Get medical advice/attention.  
P305 +P351 + P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.  
P308 + P313 IF exposed or concerned: Get medical advice/ attention:  
P321 Specific treatment see Safety Directions on the product label.  
P363 Wash contaminated clothing before reuse.

#### Disposal:

P501 Dispose of contents/container in accordance with national regulations.

**SECTION 2 HAZARDS IDENTIFICATION (Continued)**

Pictogram:

**SECTION 3 COMPOSITION/INFORMATION ON INGREDIENTS****Ingredients:**

<b>CHEMICAL</b>	<b>CAS NUMBER</b>	<b>PROPORTION</b>
Bentazone as the sodium salt	25057-89-0	480 g/L
Other ingredients (including water) determined not to be hazardous		Balance

**SECTION 4 FIRST AID MEASURES****FIRST AID**

**Ingestion:** If poisoning occurs, contact a Doctor or Poisons Information Centre. Phone 131 126. Wash mouth with water and give water to drink.

**Eye contact:** If in eyes, hold eyes open and flood with clean water until chemical is removed. Ensure irrigation under eyelids by occasionally lifting them. Do not try to remove contact lenses unless trained. If irritation persists, seek medical advice.

**Skin contact:** Wash affected skin with soap and water. Remove contaminated clothing. If skin irritation persists, re-wash area and seek medical advice. Launder contaminated clothing before re-use.

**Inhalation:** Remove to fresh air and observe until recovered. If effects persist, seek medical advice. Not expected to be a source of over-exposure.

**Advice to Doctor:** Treat symptomatically.

**SECTION 5 FIRE FIGHTING MEASURES**

**Specific Hazard:** Generally considered a low risk.

**Extinguishing media:** Not flammable. No risk of explosion if involved in a fire. Extinguish fire using media suited to burning material. If containers are ruptured contain all runoff.

**Hazards from combustion products:** Product is likely to decompose after heating to dryness and continued strong heating and will emit toxic fumes.

**Precautions for fire-fighters and special protective equipment:** Isolate fire area. Evacuate downwind residents. Firefighters to wear self-contained breathing apparatus and suitable protective clothing if risk of exposure to vapour or smoke. Do not breathe smoke or vapours generated.

**SECTION 6 ACCIDENTAL RELEASE MEASURES****Emergency procedures / Material and methods for containment and cleanup procedures:**

**Accidental release:** In the event of a major spill, prevent spillage from entering drains or water courses. For major spills, wear overalls and PVC gloves. In the case of spillage, stop leak if safe to do so, and contain spill. Contain spill and sweep up and shovel or collect recoverable material into labelled containers for use, recycling or dispose as waste as indicated in section 13 or according to the Australian Standard 2507 - Storage and Handling of Pesticides. To decontaminate spill area, tools and equipment, wash with detergent and water and add the solution to the drums of wastes already collected and label contents. Keep out animals and unprotected persons.

After spills, wash area preventing runoff from entering drains. If a significant quantity of material enters drains, advise emergency services. Thoroughly launder protective clothing before storage or re-use.

This product is a herbicide and spills can damage crops, pastures and desirable vegetation. Prevent from entering drains, waterways or sewers. Use earthen bunds or absorbent bunding to prevent spreading of spillage.

**SECTION 7****HANDLING AND STORAGE**

**Precautions for Safe Handling:** No smoking, eating or drinking should be allowed where material is used or stored. May irritate the eyes and skin. Avoid contact with eyes and skin. After use and before eating, drinking or smoking, wash hands, arms and face thoroughly with soap and water.

**Conditions for Safe Storage:** Not classified as a Dangerous Good. Store in the closed, original container in a well ventilated area away from children, animals, food, feedstuffs, seed and fertilisers. Do not store for prolonged periods in direct sunlight. This product is a Schedule 5 Poison (S5) and must be stored, transported and sold in accordance with the relevant Health Department regulations.

**SECTION 8****EXPOSURE CONTROLS / PERSONAL PROTECTION****Exposure Guidelines:**

No exposure limits have been assigned by Safe Work Australia to the ingredients in this product.

**Biological Limit Values:**

No biological limit allocated.

**Engineering controls:**

Keep containers closed when not in use. No special engineering controls are required, however make sure that the work environment remains clean and that vapours are minimised.

**Personal Protective equipment (PPE):**

Although no specific personal protective equipment is required it is good occupational practice to wear suitable personal protective equipment such as overalls and chemical resistant gloves. Avoid contact with eyes and skin. Wash hands after use.

**Personal Hygiene:** Clean water should be available for washing in case of eye or skin contamination. Wash skin before eating, drinking or smoking. Shower at the end of the workday.

**SECTION 9****PHYSICAL AND CHEMICAL PROPERTIES**

<b>Appearance:</b>	Yellow brown liquid.
<b>Odour:</b>	Faint odour.
<b>Boiling point:</b>	No data available.
<b>Freezing point:</b>	No data available.
<b>Specific Gravity:</b>	Approximately 1.1.
<b>Solubility in Water:</b>	Soluble.
<b>pH:</b>	7 - 9.
<b>Flammability:</b>	Not flammable.
<b>Flashpoint (°C):</b>	Not flammable.
<b>Poisons Schedule:</b>	This product is a schedule 5 (S5) poison.
<b>Formulation type:</b>	Soluble concentrate (SL).

**SECTION 10****STABILITY AND REACTIVITY**

**Chemical Stability:** Product is considered stable in ambient conditions for a period of at least 2 years after manufacture.

**Conditions to avoid:** Do not store for prolonged periods in direct sunlight.

**Incompatible materials:** Avoid strong acids, bases and strong oxidizing agents.

**Hazardous decomposition products:** Product is likely to decompose after heating to dryness and continued strong heating and will emit toxic fumes.

**Hazardous reactions:** Polymerisation will not occur.

**SECTION 11****TOXICOLOGICAL INFORMATION**

No specific data is available for this product as no toxicity tests have been conducted on this product. Information presented is our best judgement based on similar products and/or individual components. As with all products for which limited data is available, caution must be exercised through the use of protective equipment and handling procedures to minimise exposure.

---

**SECTION 11 TOXICOLOGICAL INFORMATION (Continued)****Potential Health Effects:****ACUTE EFFECTS**

**Swallowed:** Low acute toxicity. Direct ingestion may produce headache, nausea, dizziness and weakness. Acute Oral LD<sub>50</sub> 1000 – 2000 mg/kg.

**Eye:** May irritate the eyes.

**Skin:** This product may be irritating to the skin. Acute dermal LD<sub>50</sub> > 4,000 mg/kg.

**Inhaled:** Inhalation of mists or sprays may produce respiratory irritation.

**Long Term Exposure:**

**Chronic toxicity:** Studies of bentazone have been conducted and shown that bentazone does not appear to be teratogenic, mutagenic or carcinogenic. Bentazone is rapidly absorbed and readily excreted, unchanged, in the urine. About 91% of a 0.8 mg dose administered to rats by stomach tube was excreted in the urine within 24 hours of ingestion, with less than 1% in faeces. This suggests that bentazone is almost completely absorbed from the gastrointestinal tract into the bloodstream when it is ingested. Target organs: Animal studies have shown that the prostate gland may be affected.

---

**SECTION 12 ECOLOGICAL INFORMATION**

**Environmental Toxicology:** Bentazone is slightly toxic to birds. The oral LD<sub>50</sub> of formulated bentazone is 2000 mg/kg in mallard ducks and 720 mg/kg in Japanese quail. Bentazone is practically nontoxic to both coldwater and warmwater fish. Bentazone is slightly toxic to aquatic invertebrates. The LC<sub>50</sub> (96-hour) for bentazon in rainbow trout is 510 mg/L for a wettable powder formulation. The LC<sub>50</sub> (96-hour) for technical bentazon is 616 mg/L, in bluegill sunfish, and in rainbow trout it is 190 mg/L. For formulated bentazone, the LC<sub>50</sub> (96-hour) in bluegills is 1060 mg/L, and in rainbow trout is 636 mg/L. Bentazone is not toxic to bees.

**Environmental Fate:** Bentazone has a low persistence in soil. Its half-life is less than 2 weeks. Bentazone reaches undetectable levels in soil 6 weeks after its application. It is subject to breakdown by ultraviolet (UV) light from the sun and rapid degradation by soil bacteria and fungi. Bentazone does not bind to soil particles and it is highly soluble in water. These characteristics usually suggest a strong potential for groundwater contamination. However, its rapid degradation is expected to prevent significant contamination of groundwater. Bentazone has the potential to contaminate surface water because of both its mobility in runoff water from treated crops. Bentazone appears to be stable to hydrolysis, a chemical reaction with water. However, it has a half-life of less than 24 hours in water because it is readily broken down by sunlight.

---

**SECTION 13 DISPOSAL CONSIDERATIONS**

**Spills and Disposal:** Persons involved in cleanup require adequate skin protection - see section 8. Keep material out of streams and sewers. Vacuum, shovel or pump waste into an approved drum. Dispose of drummed wastes, including decontamination solution in accordance with the requirements of Local or State Waste Management Authorities.

**Disposal of empty containers:** Triple or (preferably) pressure rinse containers before disposal. Add rinsings to spray tank. DO NOT dispose of undiluted chemicals on-site. Break, crush, puncture and bury empty containers in a local authority landfill. If not available, bury the containers below 500 mm in a disposal pit specifically marked and set up for this purpose clear of waterways, vegetation and roots. Empty containers and product should NOT be burnt.

---

**SECTION 14 TRANSPORT INFORMATION**

**Transport:** This product is not classified as a Dangerous Goods under the Australian Code for the Transport of Dangerous Goods by Road and Rail. Product is not classified as a Dangerous Good according to International Maritime Dangerous Goods (IMDG) Code and the International Air Transport Association (IATA).

**SECTION 15****REGULATORY INFORMATION**

Under the Standard for Uniform Scheduling of Medicines and Poisons (SUSMP), this product is a schedule 5 poison.

This product is registered with the Australian Pesticides and Veterinary Medicines Authority. APVMA number 69311.

This product is classified as a Hazardous Substance under the criteria of Safe Work Australia Xn: Harmful, Xi: irritant.

This product is not classified as a Dangerous Good according to the ADG Code (7<sup>th</sup> Ed).

This product is not classified as a Dangerous Good according to International Maritime Dangerous Goods (IMDG) Code and the International Air Transport Association (IATA).

**Requirements concerning special training:**

Check State or Territory regulations that require people who use pesticides in their job or business to have training in the application of the materials.

**SECTION 16****OTHER INFORMATION**

Issue Date: 5 November 2021. Valid for 5 years until 5 November 2026.

(First issue). Key to abbreviations and acronyms used in this MSDS:

ADG Code: Australian Dangerous Goods Code (for the transport of dangerous goods by Road and Rail).

Carcinogen: An agent which is responsible for the formation of a cancer.

Genotoxic: Capable of causing damage to genetic material, such as DNA.

HSIS: Hazardous Substances information System.

Lacrimation: The production, secretion, and shedding of tears.

Lavage: A general term referring to cleaning or rinsing.

Mutagen: An agent capable of producing a mutation.

NOHSC: National Occupational Health and Safety Commission.

OCS: Office of Chemical Safety.

Pneumonitis: A general term that refers to inflammation of lung tissue.

PPE: Personal protective equipment.

Teratogen: An agent capable of causing abnormalities in a developing foetus.

TWA: The Time Weighted Average airborne concentration over an eight-hour working day, for a five day working week over an entire working life.

Safe Work Australia: Formally known as Australian Safety & Compensation Council (ASCC) which was formally known as the National Occupational Health & Safety Commission (NOHSC).
